

# Fuel up your iPhone®

The Fuel Lite is a soft-grip case that is designed to protect the iPhone with a back-up battery that will supplement the handset's power.

## Fitting

- a) power on/off button
- b) blue LED indicator
- c) blue LED indicator
- d) blue LED indicator
- e) 30-pin iPhone connector
- f) camera hole cutout
- g) usb connector

1. Separate the halves of the case by pushing the button on the back to unclip the cap
2. Carefully slide the iPhone down into the lower part of the case and gently push to connect the handset to the charging connector
3. Replace the cap by sliding it down the top of the iPhone. Please note this is a very close fit and will ease with use
4. Ensure the button on the bottom part of the case securely fits into the aperture in the top. *Please note that this button sits at a slight angle to help the two parts of the case slide together.*

## Charging

- When purchased, the Fuel Lite case will have some power but a full recharge with the USB cable provided is recommended before use
- A full recharge via the laptop should take 2.5 hours
- The cable can be plugged into a PC/laptop or into the USB slot of an apple mains charger
- The Fuel Lite can be charged with or without the iPhone in the case
- When the Fuel Lite is fully charged, three blue lights will appear
- If the iPhone is in the case with the button switched off, only the case will be charged
- If the iPhone is in the case with the button switched on, both the case and iPhone will charge, but this will take longer

## Use

- To charge your iPhone turn on the Fuel Lite case
- Press the power button on the bottom of the back of the case to turn on
- The Fuel Lite case will only recharge the iPhone when the button is switched on and the blue light comes on
- Switch the button off to stop the iPhone from charging
- As the power in the Fuel Lite is used, the blue lights will go out one by one. The final blue light will flash to indicate the Fuel Lite's power is about to run out

## Features

The battery life will differ depending on usage, however here are the approximate values

- Talktime - 2 hours ( 5 hours on 2G )
- Internet use - 2 hours (wi-fi use will increase this time to 4 hours)
- Video Playback - 2.5 hours
- Audio Playback - 5 hours
- Standby time - up to 150 additional hours beyond standard iPhone® battery life
